

Brother ScanNCut2 Paper Mobile Template

Materials

- Brother ScanNCut2 machine
- Wooden adjustable ring
- Invisible thread
- Cardstock
- Liquid glue
- Double sided tape

Instructions

1. Print the three designs provided and scan into the Brother ScanNCut2 and save.
2. Attach patterned paper to the mat and cut shapes out, following machine instructions for blade length for the cardstock used.
3. Attach six pieces of invisible thread to the wooden ring.
4. Print 24 air balloons.
5. Fold each air balloon in half and attach two pieces together on one side only with double sided tape and glue.
6. Fasten a piece of invisible thread on the centre of the two attached pieces of air balloon.
7. Attach two more pieces of air balloon to this to create the 3D effect.
8. Print 12 clouds—6 with pattern side of paper facing up on your mat, 6 with white side of paper facing up to ensure pieces match up when glueing.
9. Attach one piece of cloud to the invisible thread using double sided tape and glue to attach another piece to sandwich the thread.
10. Repeat step 8 & 9 for birds.
11. Continue to attach all the pieces are varying heights and intervals to the six pieces of thread.
12. Cut off any excess thread from the bottom.
